PJS Solutions Robust Partition System “F120S” has been designed to achieve 2 hour fire resistance up to heights of 15m using PJS heavy gauge steel sections clad with **PJS** robust performance boards with mineral wool infill to give excellent acoustic ratings. This system can be upgraded to achieve higher thermal & acoustic values. There are many options for heavy traffic / fork lift protection. **PJS Solutions** supply and install 2 hour fire rated fixed windows, doors & automated roller shutter doors to compliment the “F120S” system.

The **PJS Solutions** “F120S” system only uses **PJS** robust performance boards. **PJS** robust performance boards are inherently very much stronger than conventional plasterboard and, as well as its strength and acoustic properties, it also provides fire, impact, and moisture resistance. The strength comes from its gypsum matrix, which is reinforced with recycled paper and, because of its higher density, is far more effective in reducing sound transmission.

Performance Table:

Wall Height, up to:	<7m	<8m	<9m	<10 m	<11 m	<12 m	<13 m	<14 m	<15 m
Fire Rating (hours)	2	2	2	2	2	2	2	2	2

System weight / m ² (approx)	69	71	76	77	82	84	89	92	99
Acoustic Sound Rating (dB)	Basic rating = 62dB, can be upgraded to 68dB								
U-values W/m ² k	Standard rating = 0.4 W/m ² k upgradable to 0.18 W/m ² k								

Wall Lay Out & Components:

Partition systems range in height from 2.0m high up to 15m high, The 2 hour fire rating is backed by Warrington Fire Certificate. There is no limit to the length of the wall.

Advantages of PJS robust performance boards:

- **PJS** robust performance board is a class '0' and class '1' Board and provides F60 applications from single layer constructions up to 15m high.
- **PJS** robust performance boards waterproofing application system to give peace of mind. It can withstand humidity levels of up to 80% Rh. Maybe installed before building envelope is complete
- **PJS** robust performance boards is strong enough to use in schools, sports halls and hospitals, reducing the need for ply-backing. **PJS** robust performance boards meets BS 5234:part 2 Severe Duty Rating.
- **PJS** robust performance boards is high load bearing and can carry up to 30kg from a single screw and up to 50kg from 2 wall plug fitting which virtually

- **PJS** robust performance boards meets and exceeds Part E B893 and HTM 2045 requirements. It can be used for walls, ceilings or floors where sound proofing is required. A 100 mm wide stud wall with **PJS** robust performance board gives better acoustic reduction than a 275mm block wall.

eliminates the need for noggins
