F60S Smooth Painted Finish

PJS Solutions Limited, PJS Solutions House, Cropredy Lawn, Cropredy, Banbury, Oxfordshire, OX17 1DR

PJS Solutions Robust Partition System "F6OS" has been designed to acheive 1 hour fire resistance up to heights of 15m using PJS heavy gauge steel sections clad with PJS robust performance boards with mineral wool infill to give excellent acoustic ratings. This system can be upgraded to achieve higher thermal & acoustic values. There are many options for heavy traffic / fork lift protection. PJS Solutions supply and install 1 hour fire rated fixed windows, doors & automated roller shutter doors to compliment the "F6OS" system.

The PJS Solutions "F6OS" system only uses PJS robust performance boards. PJS robust performance boards are inherently very much stronger than conventional plasterboard and, as well as its strength and acoustic properties, it also provides fire, impact, and moisture resistance. The strength comes from its gypsum matrix, which is reinforced with recycled paper and, because of its higher density, is far more effective in reducing sound transmission.

Wall Lay Out & Components:

Partition systems range in height from 2.0m high up to 15m high, The 1 hour fire rating is backed by Warrington Fire Certificate. There is no limit to the length of the wall.

PJS Fine Surface Treatment For giving PJS boards a smoother finish if required

Advantages of PJS robust performance boards:

- PJS robust performance boards is a class 'O' and class '1' Board and provides F6OS applications from single layer constructions up to 15m high.
- PJS robust performance boards waterproofing application system to give peace of mind. It can withstand humidity levels of up to 80% Rh. Maybe installed before building envelope is complete
- PJS robust robust performance boards is strong enough to use in schools, sports halls and hospitals, reducing the need for ply-backing. PJS robust performance meets BS 5234:part 2 Severe Duty Rating.
- PJS robust robust performance boards is high load bearing and can carry up to 30kg from a single screw and up to 50kg from 2 wall plug fitting which virtually eliminates the need for noggins

 PJS robust performance boards meets and exceeds Part E B893 and HTM 2045 requirements. It can be used for walls, ceilings or floors where sound proofing is required. A 100 mm wide stud wall with PJS robust performance gives better acoustic reduction than a 275mm block wall.
